

Project Design Phase-I

Solution Architecture

Date	01.10.2022
Team ID	PNT2022TMID08074
Project Name	Nutrition Assistant Application
Maximum marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – which bridges the gap between technology solutions. Its goals are to:

- find the best tech solution to solve existing technology problems.
- describe the structure, characteristics, behaviour, and other aspects of the software to project stakeholders.
- define features, development phases, and solution requirements.
- provide specifications according to which the solution is defined, managed, and delivered.
